

DIGITAL BROCHURE

Not just an LMS. Your AI-powered institute engine.

Drop in a textbook, a syllabus, or a single prompt — Classpedia builds a complete course: video, audio, text, assignments, and quizzes, in a fraction of the time your faculty spend today.

[See how many hours you're losing](#)

THE PROBLEM

Where your budget is actually going

Every course your faculty build by hand costs weeks of their time and thousands of your budget — and that's before you multiply it across a whole catalog.

184 hrs

of instructional-design time, on average, to build just one finished hour of e-learning content.

Source: Chapman Alliance / ATD research

\$9.3K–\$35.6K

the estimated cost to develop one finished hour of e-learning, depending on how interactive it is.

Source: ATD / Kapp & DeFelice research

96%

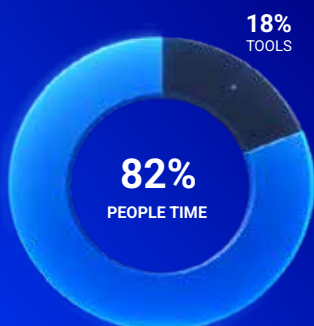

of universities already run a Learning Management System. The question isn't whether — it's whether yours is holding your faculty back.

Source: EDUCAUSE, 2026

47%

of institutions have moved AI into how they actually operate. Most are still building every course by hand.

Source: UNESCO / EDUCAUSE, 2026

The Real Cost
Most of your spend isn't technology.
It's time.

TIME TO BUILD 1 HOUR

THE COST

Students already expect this. Does your catalog?

AI adoption in higher ed is accelerating everywhere except the course content itself. That gap is quietly becoming a liability.

86%

of students already use AI in their studies. If your courses don't keep pace, they'll notice.

AI in Education Statistics, 2026

71%

of teachers say they lack formal AI training — a gap Classpedia closes by building Loomi into the tool itself, not a separate course.

AI in Education Statistics, 2026

Only 10%

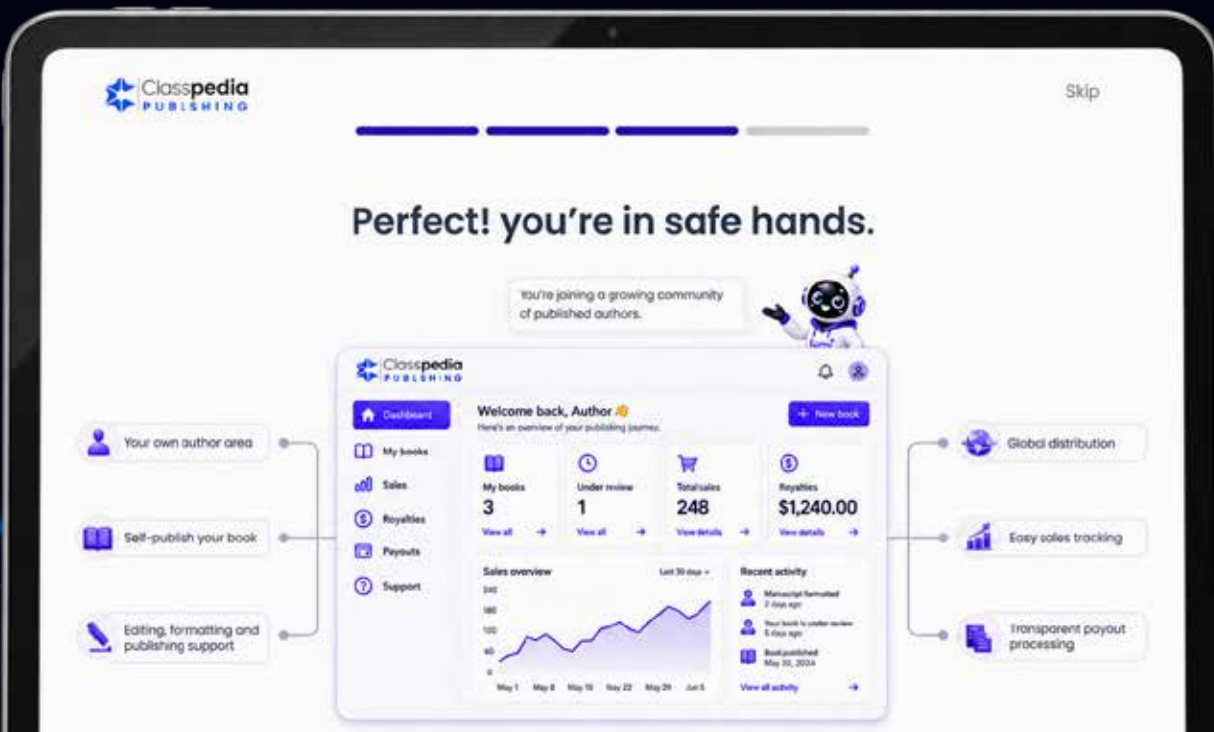

of institutions have formal AI guidelines in place. Most are improvising, one course at a time.

AI in Education Statistics, 2026

42% CAGR

how fast the AI-in-education market is growing. The institutions modernizing now are the ones setting the pace.

THE SOLUTION

A full LMS — with an AI course engine built in

Classpedia runs everything your institution needs, and builds the courses your faculty don't have time to.

1

AI Course Generator

Drop in a textbook or write a prompt — Classpedia generates a complete course: video lectures, audio narration, readings, assignments, and quizzes.

3

A Real LMS Backbone

Classrooms, gradebook, multi-campus administration, SIS/SSO, and accreditation-ready reporting — everything a real institution runs on.

2

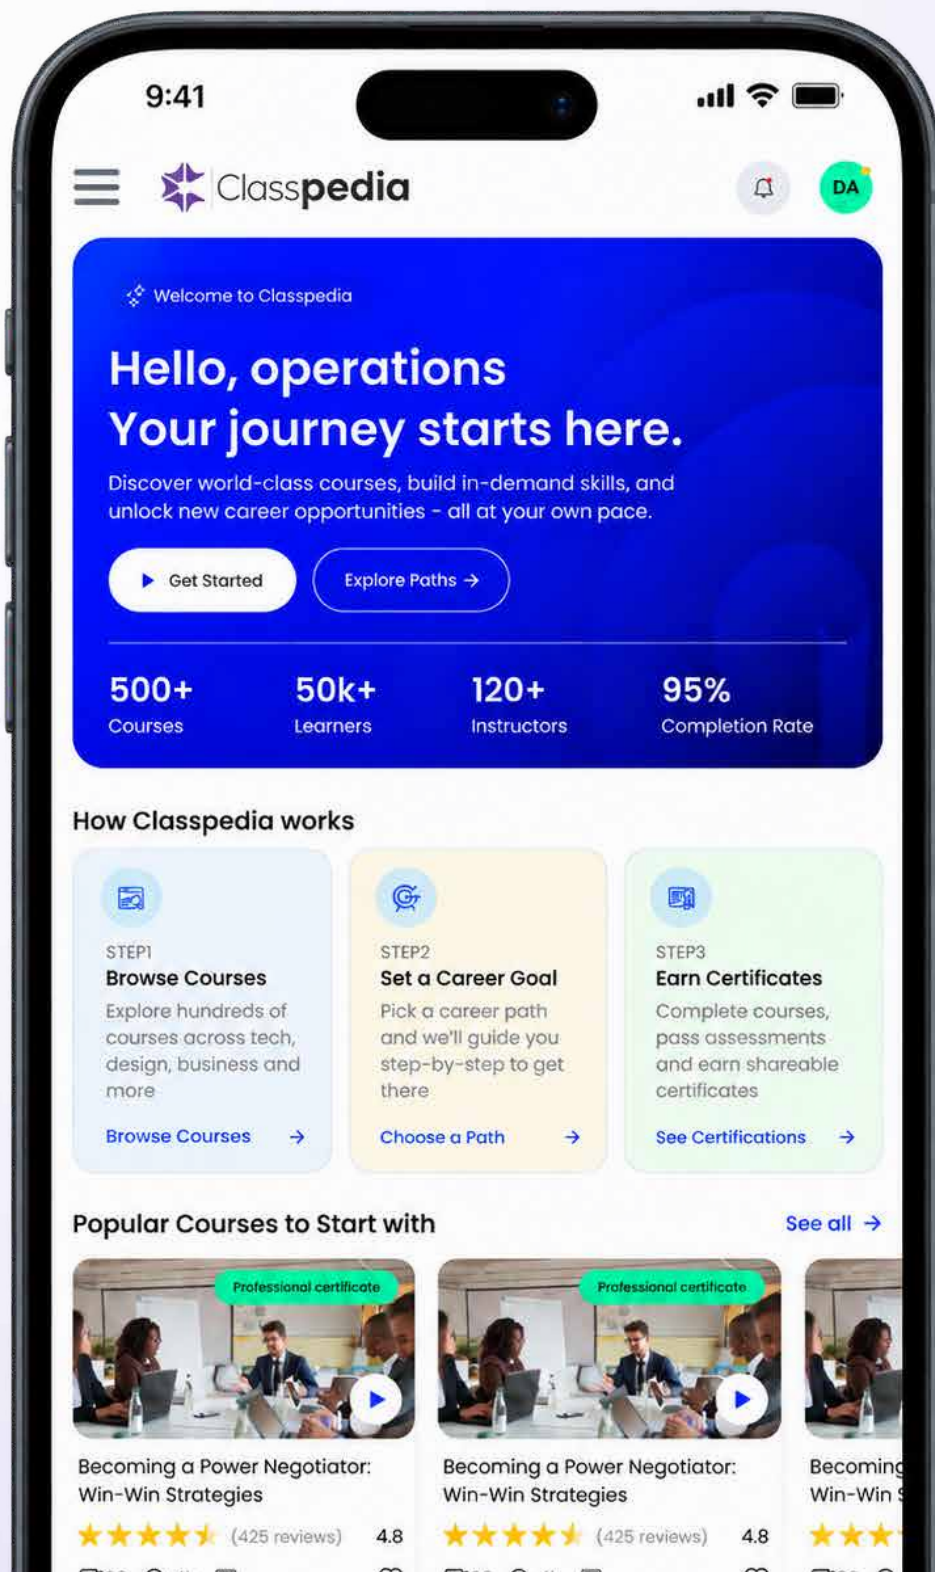

Loomi, Your AI Assistant

Built into every screen — helps faculty build, students learn, and admins manage, without waiting on a help desk.

4

Built to Scale

Launch new courses and programs without scaling your instructional-design team or your budget to match.

SEE CLASSPEDIA IN ACTION

One upload. A finished course.

This is what happens the moment a faculty member drops in a single chapter — no instructional designer, no media team, no semester-long wait.

Chapter 4: Cellular Respiration

Uploaded to Classpedia

Loomi generates

- ✓ Video lecture, narrated and slide-synced
- ✓ Audio-only version for on-the-go review
- ✓ Readings, summaries, and study notes
- ✓ 10-question quiz, auto-graded
- ✓ Assignment, with rubric included

Course chapter, ready to teach

Minutes, not weeks.

Every output comes from the material your faculty already trust — their own textbook, their own syllabus, their own voice — so it's ready to publish, not rewrite.

THE COMPARISON

Classpedia vs. the old way of building courses

Traditional development locks up a team for weeks. Classpedia gives one faculty member a finished course by lunch.

	Traditional course development	Classpedia
 Time	Weeks to months per course, per Chapman Alliance / ATD research	Minutes to draft, hours to review and publish
 Team required	Instructional designer, subject-matter expert, and a media team	One faculty member, working with Loomi
 Output	Usually slides and a syllabus, sometimes a recorded lecture	Video, audio, text, quizzes, and assignments — every time
 Cost	\$9.3K–\$35.6K per finished hour of content	Included in your Classpedia subscription
 Consistency	Varies course to course, instructor to instructor	Same LMS, same quality bar, every course, every campus

THE RETURN

This isn't a cost. It's time and outcomes, given back.

Classpedia doesn't just save your institution money — it shows up as faculty hours reclaimed and better results in the classroom.

54% higher

test scores reported in AI-enhanced learning environments, compared to traditional instruction alone.

AI in Education Statistics, 2026

2x

the learning gains, in less time — what Harvard research found when comparing AI-assisted tutoring to standard instruction.

Harvard research, cited in AI in Education Statistics, 2026

5.9 hrs/week

reclaimed by faculty who use AI weekly — nearly six extra weeks of their time back over a school year.

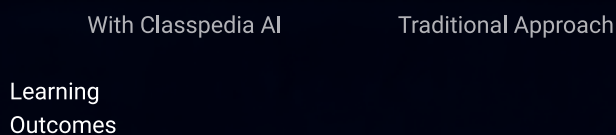

AI in Education Statistics, 2026

\$23B

the size of the AI-in-education market in 2026, and still growing fast. This isn't experimental technology anymore.

Grand View Research / industry market data

More outcomes. Less time. Compounding impact.

LET'S TALK

Ready to clear the backlog?

Classpedia turns the materials your faculty already trust into finished, ready-to-teach courses — while your institution runs on one real LMS, built for scale.
